MEMORANDUM

TO: Board of County Commissioners

FROM: Timothy J. McGarry, AICP
Director of Growth Management

DATE: September 15, 2004

SUBJECT: **Report on the Reduction in Available ROGO Allocations and Lack of Nutrient Reduction Credits**

At Mayor's request, this report is intended to provide an update on the issues related to loss of ROGO allocations and lack of available nutrient reduction credits. It is organized as a series of questions and answers that will hopefully clarify the issues involved and their ramifications for the County's permitting of new residential development.

O Why Were No ROGO Allocations Made by the Planning Commission at its September 8 Meeting?

At its September 8 regularly scheduled meeting, the Planning Commission was unable to make any ROGO allocations for the 4th Quarter of the last ROGO year (ROGO 12) due the lack of ROGO allocations. If allocations had been available, 30 market rate and four affordable housing applications would have received allocations subject to obtaining nutrient reduction credits.

No ROGO allocations were available because of the policy requirements of 101.2.13 enacted by rule of the Florida Administration Commission. This policy is implemented through a five-party interagency agreement.

This policy requires that a nutrient reduction credit be available before a new residential permit may be issued. It also requires that at the end of each ROGO year (July 12 of each year), the number of ROGO allocation awards in the next ROGO year will be reduced by the number of ROGO applications with sufficient scores to receive a ROGO allocation award, but which were still waiting for a nutrient reduction credit.

At the end of ROGO Year 11 (July 12, 2003), there were 41 such applications with a sufficient ranking to receive an award, but waiting for a nutrient reduction credit. Therefore, the number of allocations available in Year 12 (July 13, 2003 through July 12, 2004) had to be reduced by 41 from the total of 158 available in the next ROGO year. [It should be noted that the County lost 84 allocations in previous years due to this policy; these lost allocations were eventually restored to the County as affordable housing allocations through an agreement with DCA.]

The staff deliberately chose not to subtract these 41 allocations from any of the first three quarters of this ROGO year in hopes that the Florida Administration Commission would proceed through rule making to provide relief. Although, the draft rule does provide for the retroactive clearing of this backlog, it will still be at least several months before going into effect, even assuming the challenge to the rule is successfully defended.

Subsequent to the Planning Commission's September 8 meeting, the staff has determined that some affordable housing allocations are still available even with the required reductions. [Unlike market rate allocations, affordable housing allocations may be carried over into the next ROGO year; thereby allowing these allocations.] In light of this determination, the staff will recommend that the Planning Commission award allocations to the four affordable housing applicants in last ROGO quarter. With these four allocations for affordable housing, the County will still have 21 allocations available for affordable housing in future ROGO quarters.

O Will the County Be Able to Make Allocations in Next ROGO Quarter and Beyond?

In the next ROGO quarter, which is the first quarter of ROGO Year 13, the County will have allocations available in addition to the 21 allocations for affordable housing carried over from the previous ROGO year; however, the total number of allocations available for the next ROGO year (158 allocations) will have to be reduced by 95 (end of ROGO Year 12 backlog of allocations without nutrient reduction credits) due to the requirements of Policy 101.2.13.

In a typical ROGO quarter, the County has 31 or 32 market rate allocations available. The number of affordable housing allocations for a ROGO year (32) are all available in the first quarter of the year, including any affordable allocations carried over from the previous year.

In the first quarter of the ROGO Year, the staff proposes to make available 32 allocations for market rate housing and 40 for affordable housing allocations. [The Planning Commission will make these allocations in December 2004.] In the second quarter, assuming the new rule is not in effect, the County would then have 11 market rate allocations available and the remainder of the affordable housing not allocated in the first quarter.

Again assuming the new rule is not in effect, no allocations will be available for market rate housing in the third and fourth quarters. The remainder of the affordable housing

allocations, not allocated in the first and second quarters, will be available in the remaining two quarters.

O Will the County Be Able to Recover These “Lost” Allocations?

Once the rule goes into effect, the County should be able recover these lost allocations assuming that the provisions in the draft rule for the 41 lost allocations and the authority to allow roll-over of market rate housing allocations are retained as proposed.

O Doesn’t Our Agreement with DCA Address the Loss of Allocations?

While DCA has been very cooperative in working with the County in drafting a rule that eliminates the problems with nutrient reduction credits and the penalty effect of the lack of nutrient reduction credits on the County’s annual allocation, the rule is only a draft. Until this new draft is approved by the Florida Administration Commission, the current rule is still in effect and is one which both the County and DCA are required to follow.

The staff has discussed with DCA staff and legal counsel possible ways to minimize the penalty provisions of the existing rule; unfortunately, no viable alternative exists other than to amend the rule. To do anything out of the ordinary at this time, may only jeopardize the County’s and DCA’s position defending the challenge to the proposed draft rule.

O What if We Obtain Sufficient Nutrient Reduction Credits to Reduce the Backlog?

Although any additional nutrient reduction credits that can be obtained is definitely welcomed, it does not eliminate the backlog penalty for the County. Only an amended rule can eliminate or ameliorate this penalty.

O Why is An Insufficient Number of Nutrient Reduction Credits Being Generated with Stock Island and the Little Venice Facility Coming on Line?

Stock Island (KW Resort Utility). Stock Island has not been generating very many nutrient reduction credits. Most of the existing systems are permitted and no nutrient reduction credits can be generated for these systems, which are only being upgraded to secondary treatment. Only on-site systems that are determined to be cesspools generate any credit and these only provide a 0.5 credit when connected to a system which is not at a BAT and AWT standard.

In preparing the rule amendment, the staff negotiated with DCA and DOH (Department of Health) to allow a 0.5 credit to be generated up front for all connections to a system with a secondary level of wastewater treatment (such as the KW Resort Utility) with the proviso to provide an additional 1.0 credits for each connection after the wastewater treatment plant is upgraded to AWT. Unfortunately, Comprehensive Plan Policy 101.2.13, which was enacted by Rule 28-20.110, does not authorize this graduated credit schedule. Once the new rule is enacted the intergovernmental agreement will be amended to establish specific procedures for the revised nutrient reduction credit schedule.

Little Venice. Unfortunately, although numerous permits have been issued for connections, to date the Little Venice system has only generated 6 nutrient reduction credits. No nutrient reduction credits can be generated, until final inspections are made on the decommissioning of abandoned systems. The lack of licensed contractors has furthered hampered progress on decommissioning on-site systems. Additionally, it should be noted that before any credits can be distributed for new allocations, the 213 borrowed credits authorized under the existing rule must be repaid.

The Growth Management Division staff has met with representatives of DCA, City of Marathon, and DOH to discuss the distribution of nutrient reduction credits. Consensus was reached on the distribution of the Little Venice credits and other pertinent procedures, which will be memorialized in an amended intergovernmental agreement.

After deducting for the 213 nutrient reduction credits that were borrowed, it is estimated that the County is entitled to 294 nutrient reduction credits from the Little Venice facility. It is anticipated that a majority of these credits will all become available over the next couple of months.

A briefing on this issue will be given to the Board at its September 21 meeting under the Growth Management Director's report. In the meantime, should you have any questions, please don't hesitate to call me.

cc: James L. Roberts, County Administrator
K. Marlene Conaway, Director of Planning and Environmental Resources
